## Seyed Ehsan seyed bolouri  1567349

# Survival Case

| | b | C | SIGMA | D | ACCURACY |
|---|---|---|---|---|---|
| Lin_primal | 2.4776 | 32 | -- | -- | 0.8583 |
| Lin_dual | 19.58 | 0.1250 | -- | -- | 0.8500 |
| Poly | 341.6239 | 32 | -- | 2 | error |
| Rbf | -4.8645 | 32 | 8 | -- | error |

# Chess Case

| | b | C | SIGMA | D | ACCURACY |
|---|---|---|---|---|---|
| Lin_primal | 2.4776 | .5 | -- | -- | .5209 |
| Lin_dual | 27.6927 | 32 | -- | -- | .4958 |
| Poly | -17.1489 | 8 | -- | 8 | .767 |
| Rbf | error | error | error | -- | error |

# Iris Case

| | b | C | SIGMA | D | ACCURACY |
|---|---|---|---|---|---|
| Lin_primal | 2.8819 | 32 | -- | -- | 0.6415 |
| Lin_dual | 0.0852 | 0.313 | -- | -- | 0.6586 |
| Poly | error | error | -- | error | error |
| Rbf | error | error | error | -- | error |

- I do not know why I get some non-convex error in chess case and iris case for polynomial and Gaussian distribution!! I checked the process several times but unfortunately, I could not debug it. Would you please consider partial points for these parts?
